#### 1. Summary of Significant Accounting Policies and Going Concern

A. The accompanying financial statements of New York Life Insurance and Annuity Corporation ("the Company") have been prepared using accounting practices prescribed or permitted by the Delaware State Insurance Department ("DSID").

The DSID recognizes only statutory accounting practices prescribed or permitted by the State of Delaware for determining and reporting the financial position and results of operations of an insurance company and for determining its solvency under the Delaware State Insurance Law. The National Association of Insurance Commissioners' ("NAIC") *Accounting Practices and Procedures Manual* ("NAIC SAP") has been adopted as a component of prescribed or permitted practices by the State of Delaware. Prescribed statutory accounting practices include state laws and regulations. Permitted statutory accounting practices encompass accounting practices that are not prescribed; such practices differ from state to state, may differ from company to company within a state, and may change in the future. The Company has no permitted practices.

A reconciliation of the Company's net income and capital and surplus at June 30, 2018 and December 31, 2017 between practices prescribed or permitted by the State of Delaware and NAIC SAP is shown below:

	SSAP #	F/S Page	F/S Line #		2018	 2017
Net Income						
(1) Net income Delaware state basis (Page 4, Line 35, Columns 1 & 2)	XXX	XXX	XXX	\$	156,189,462	\$ 652,178,410
(2) State prescribed practices that increase/(decrease) NAIC SAP:					_	_

#### B. No change.

- **C.** (1) (5) No change.
  - (1) Loan-backed and structured securities, which are included in bonds, are valued at amortized cost using the interest method including current assumptions of projected cash flows. Loan-backed and structured securities in or near default (rated NAIC 6) are stated at the lower of amortized cost or fair value. Amortization of the premium or accretion of discount from the purchase of these securities considers the estimated timing and amount of cash flows of the underlying loans, including prepayment assumptions based on data obtained from external sources or internal estimates. Projected future cash flows are updated monthly, and the amortized cost and effective yield of the securities are adjusted as necessary to reflect historical prepayment experience and changes in estimated future prepayments. For high credit quality loan-backed and structured securities (those rated AA or above at the date of acquisition), the adjustments to amortized cost are recorded as a charge or credit to net investment income in accordance with the retrospective method. For loan-backed and structured securities that are not of high credit quality (those rated below AA at date of acquisition), certain floating rate securities and securities with the potential for a loss of a portion of the original investment due to contractual prepayments (e.g. interest only securities), the effective yield is adjusted prospectively for any changes in estimated cash flows. Refer to Note 20 Fair Value Measurements, for discussion on the valuation approach and methods for bonds.

The cost basis of loan-backed and structured securities is adjusted for impairments in value that are deemed to be other-than-temporary. An other-than-temporary loss is recognized in net income when it is anticipated that the amortized cost will not be recovered. The entire difference between the loan-backed or structured security's amortized cost and its fair value is recognized in net income only when the Company (1) has the intent to sell the security or (2) it does not have the intent and ability to hold the security to recovery. If neither of these two conditions exists, a realized loss is recognized in net income for the difference between the amortized cost basis of the security and the net present value of projected future cash flows expected to be collected. The net present value is calculated by discounting the Company's best estimate of projected future cash flows at the effective interest rate implicit in the loanbacked or structured security prior to impairment.

The new cost basis of an impaired security is not adjusted for subsequent increases in estimated fair value. In periods subsequent to the recognition of an other-than-temporary loss, the impaired loan-backed and structured security is accounted for as if it had been purchased on the measurement date of the impairment. Accordingly, the discount (or reduced premium) based on the new cost basis may be accreted into net investment income in future periods based on prospective changes in cash flow estimates, to reflect adjustments to the effective yield.

### (7) - (13) No change.

D. Going Concern

The Company does not have any doubt about its ability to continue as a going concern.

### 2. Accounting Changes and Corrections of Errors

Not applicable.

#### 3. Business Combinations and Goodwill

Not applicable.

#### **Discontinued Operations**

Not applicable.

### 5. Investments

A. Mortgage Loans, including Mezzanine Real Estate Loans

No change.

### B. Debt Restructuring

No change.

### C. Reverse Mortgages

No change.

### D. Loan-Backed Securities

- (1) Prepayment assumptions for mortgage-backed/loan-backed and structured securities were obtained from external sources such as Intex and Blackrock Solutions.
- (2) The Company does not have any loan-backed and structured securities, which are other-than-temporarily impaired where the Company intends to sell, or does not have the intent and ability to hold until recovery, at June 30, 2018.
- (3) The following table lists each security at a CUSIP level where the present value of cash flows expected to be collected is less than the amortized cost basis during the current year:

<sup>1</sup> Only the impaired lots within each CUSIP are included within this table.

(4) The following table presents the Company's gross unrealized losses and fair values for loan-backed and structured securities, aggregated by the length of time that the individual securities have been in a continuous unrealized loss position at June 30, 2018:

	Less than 12 Months			12 Months or Greater			Total		
	Estimated Fair Value		Unrealized Losses	Estimated Fair Value		Unrealized Losses	Estimated Fair Value		Unrealized Losses
General Account	\$13,179,664,666	\$	346,066,503	\$4,659,951,177	\$	353,626,654	\$17,839,615,843	\$	699,693,157
Guaranteed Separate Accounts	898,234,384		20,855,737	232,612,754		16,892,550	1,130,847,138		37,748,287
Total	\$14,077,899,050	\$	366,922,240	\$4,892,563,931	\$	370,519,204	\$18,970,462,981	\$	737,441,444

<sup>(5)</sup> The Company performs quantitative and qualitative analysis to determine if a decline in fair value was temporary. For those securities where the decline was considered temporary, the Company did not take an impairment when it had the ability and intent to hold until recovery. Factors considered in evaluating whether a decline in value is other-than-temporary include: (1) whether the decline is substantial; (2) the duration that the fair value has been less than amortized cost; (3) the financial condition and near-term prospects of the issuer; and (4) the Company's ability and intent to retain the investment for the period of time sufficient to allow for an anticipated recovery in value. In addition, for the non-agency residential mortgage backed securities ("RMBS") portfolio, the Company updates cash flow projections quarterly. A projection is performed for each security based upon the evaluation of prepayment, delinquency, and default rates for the pool of mortgages, but do not include market prices. As a result, forecasts may change from period to period and additional impairments may be recognized over time as a result of deterioration in the fundamentals of a particular security or group of securities and/or a continuation of heightened mortgage defaults for a period longer than the assumptions used for the forecasts. Both qualitative and quantitative factors are used in creating the Company's RMBS cash flow models. As such, any estimate of impairments is subject to the inherent limitation on the Company's ability to predict the aggregate course of future events. It should therefore be expected that actual losses may vary from any estimate and the Company may recognize additional other-than-temporary losses.

### E. Dollar Repurchase Agreements and/or Securities Lending Transactions

- (1) (2) No change.
- (3) Collateral Received
  - a. No change.
  - b. The Company has not sold or repledged collateral received from securities lending agreements. All collateral is received in cash.
  - c. No change.
- (4) (7) No change.

### F. Repurchase Agreements Transactions Accounted for as Secured Borrowing

Not applicable.

#### G. Reverse Repurchase Agreements Transactions Accounted for as Secured Borrowing - Cash Provider

(1) The Company enters into tri-party reverse repurchase agreements to purchase and resell short-term securities. The Company as a cash provider receives securities as collateral, having a fair value at least equal to 102% of the purchase price paid by the Company for the securities and the Company's designated custodian takes possession of this collateral. The Company is not permitted to sell or repledge these securities. The collateral is not recorded on the Company's financial statements. However, if the counterparty defaults, the Company would then exercise its rights with respect to the collateral, including a sale of the collateral. The fair value of the securities held as collateral is monitored daily and additional collateral is obtained, where appropriate, to protect against credit exposure. The Company records the amount paid for securities purchased under agreements to resell in cash, cash equivalents and short-term investments.

At June 30, 2018, the carrying value and fair value of securities held under agreements to purchase and resell was \$224,600,000, which were classified as tri-party reverse repurchase agreements and included with cash, cash equivalents and short-term investments on Page 2 - Assets. The securities had a weighted average maturity of two days and a weighted average yield of 2.1%.

### 10. Information Concerning Parent, Subsidiaries, Affiliates and Other Related Parties

A - C. In 2018, the Company paid a dividend of \$600,000,000 to its parent company, New York Life Insurance Company ("New York Life").

- D N. No change.
- 11. Debt
  - A. No change.
  - B. Federal Home Loan Bank ("FHLB") Agreements
    - (1) On February 18, 2015, the Company became a member of the FHLB of Pittsburgh or the "Bank". Membership in the Bank provides the Company with a significant source of alternative liquidity. Advances received by the general account are included in the liability for borrowed money on Page 3 Liabilities, Surplus and Other Funds. When borrowing from the Bank, the Company is required to post collateral in the form of eligible securities, including mortgage-backed, government and agency debt instruments for each of the advances received. Upon any event of default by the Company, the FHLB of Pittsburgh's recovery from the collateral is limited to the amount of the Company's liability to the FHLB of Pittsburgh. The table below indicates the amount of FHLB of Pittsburgh stock purchased, collateral pledged, assets and liabilities related to the agreement with the Bank.

- (2) FHLB of Pittsburgh Capital Stock
  - a. Amount of FHLB of Pittsburgh capital stock held, in aggregate, is as follows:
    - 1. Current year

	Total	Ge	eneral Account	Separate Accounts	
Membership stock - Class A	\$ _	\$		\$	_
Membership stock - Class B	27,560,500		27,560,500		—
Activity stock	_		—		—
Excess stock	_		_		_
Aggregate Total	\$ 27,560,500	\$	27,560,500	\$	—
Actual or estimated borrowing capacity as determined by insurer	\$ 4,993,832,024	\$	4,993,832,024	\$	_
2. Prior Year					
	 Total	Ge	eneral Account	Separate Accounts	
Membership stock - Class A	\$ _	\$	—	\$	—
Membership stock - Class B	26,397,600		26,397,600		_
Activity stock	_		_		_
Excess stock	_		_		_
Aggregate total	\$ 26,397,600	\$	26,397,600	\$	—
Actual or estimated borrowing capacity as determined by insurer	\$ 4,902,735,493	\$	4,902,735,493	\$	_

The FHLB borrowing capacity for the Company is determined using 5% of the Company's total admitted assets at the current reporting date, less any secured borrowing amounts.

b. Membership stock (Class A and B) eligible and not eligible for redemption is as follows:

Membership Stock	p Current Year Total		Not Eligible for Redemption		Less than 6 Months		6 Months to Less than 1 Year		1 to Less than 3 Years		3 to 5 Years	
Class A	\$	_	\$	_	\$	_	\$		\$	_	\$	_
Class B	\$	27,560,500	\$	27,560,500	\$		\$	_	\$	_	\$	_

### (3) Collateral pledged to FHLB of Pittsburgh

a. At June 30, 2018, the Company did not have a balance due to the FHLB of Pittsburgh.

b. Maximum amount of collateral pledged during reporting period is as follows:

		Fair Value <sup>1</sup>	Ca	urrying Value <sup>1</sup>	Time of Maximum Collateral
<ol> <li>Current year total general and separate accounts</li> </ol>	\$	11,083,727	\$	11,083,727	\$ 
2. Current year general account	\$	11,083,727	\$	11,083,727	\$ _
3. Current year separate accounts	\$	_	\$	—	\$ _
4. Prior year total general and separate accounts	\$	16,566,410	\$	16,566,410	\$ 10,000,000
<sup>1</sup> Includes amounts in excess of minimum requirem	ents.				

American Democrat

### (4) Borrowing from FHLB of Pittsburgh

- a. At June 30, 2018, the Company did not have a balance due to the FHLB of Pittsburgh.
- b. Maximum amount borrowed during current reporting period is as follows:

	Total		General Account	Separate Accounts	
Debt	\$	_	\$ —	\$ -	_
Funding agreements		—	—	-	_
Other		—		-	_
Aggregate total	\$	_	\$ —	\$ -	Ξ
					_

c. FHLB of Pittsburgh borrowings subject to prepayment obligations is as follows:

	Does the Company have prepayment obligations under the following arrangements (YES/NO)?
Debt	No
Funding agreements	N/A
Other	N/A

12. Retirement Plans, Deferred Compensation, Postemployment Benefits and Compensated Absences and Other Postretirement Benefit Plans

A - I. No change.

### 13. Capital and Surplus, Shareholders' Dividend Restrictions, and Quasi-Reorganizations

- (1) (3) No change.
- (4) During 2018, the Company paid a \$600,000,000 dividend to its sole shareholder, New York Life.
- (5) (13) No change.

### 14. Liabilities, Contingencies and Assessments

### A. Contingent Commitments

### 20. Fair Value Measurements

- A. The Company's financial assets and liabilities carried at fair value have been classified, for disclosure purposes, based on a hierarchy defined by SSAP No. 100, "Fair Value Measurements". Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. This guidance establishes a framework for measuring fair value that includes a hierarchy used to classify the inputs used in measuring fair value. The hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three levels. The level in the fair value hierarchy within which the fair value measurement falls is determined based on the lowest level input that is significant to the fair value measurement.
  - (1) The levels of the fair value hierarchy are based on the inputs to the valuation as follows:
    - Level 1 Fair value is based on unadjusted quoted prices for identical assets or liabilities in an active market. Active markets are defined as a market in which many transactions occur with sufficient frequency and volume to provide pricing information on an ongoing basis.
    - Level 2 Observable inputs other than level 1 prices, such as quoted prices in active markets for similar assets or liabilities; quoted prices in markets that are not active for identical or similar assets or liabilities, or other model driven inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Valuations are generally obtained from third-party pricing services for identical or comparable assets or liabilities or through the use of valuation methodologies using observable market inputs.
    - Level 3 Instruments whose values are based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. These inputs reflect management's own assumptions in pricing the asset or liability. Pricing may also be based upon broker quotes that do not represent an offer to transact. Prices are determined using valuation methodologies such as option pricing models, discounted cash flow models and other similar techniques. Non-binding broker quotes, which are utilized when pricing service information is not available, are reviewed for reasonableness based on the Company's understanding of the market, and are generally considered Level 3. To the extent the internally developed valuations use significant unobservable inputs, they are classified as Level 3.

The following table represents the balances of assets and liabilities measured at fair value as of June 30, 2018:

			Quoted Prices in Active Markets for Identical Assets (Level 1)	1	Significant Observable Inputs (Level 2)		Significant nobservable Inputs (Level 3)		Total
a.		Assets at fair value							
	1.	Bonds							
		U.S. corporate	\$ —	\$	9,155,263	\$	—	\$	9,155,263
		Non-agency commercial mortgage- backed securities	_		_		_		—

b.		Liabilities at fair value							
	1.	Derivative liabilities							
		Interest rate swaps	\$ —	\$	114,279,971	\$	—	\$	114,279,971
		Foreign currency swaps	—		76,339,889		—		76,339,889
		Inflation swaps	—		_		—		—
		Foreign currency forwards	—		80,660		—		80,660
		Futures	6,250		_				6,250
		Total derivative liabilities	6,250		190,700,520				190,706,770
	2.	Separate accounts liabilities - derivatives <sup>1</sup>	_		6,373,499		_		6,373,499
		Total liabilities at fair value	\$ 6,250	\$	197,074,019	\$		\$	197,080,269
				_		_		_	

Separate accounts contract holder liabilities are not included in the table as they are reported at contract value and not fair value in the Company's Annual Statement.

(2) The table below presents a rollforward of Level 3 assets and liabilities for the three months ended June 30, 2018:

	Balance at 03/31/2018	Transfers into Level 3	Transfers out of Level 3	or (losses)	Total gains or (losses) included in Surplus	Purchases	Issuances	Sales Set		alance at 5/30/2018
Non-agency asset-backed securities	\$ 1,827,078	\$ —	\$ —	\$ — \$	(250,486)	\$ —	\$ — \$	— \$	(13,720) \$	1,562,872
Common stocks	31,991,881	_	_	34	99,927	2,052,392	—	(35)	_	34,144,199
Derivatives	32,493,766	—	_	(3,773,885)	(3,441,705)	—	—	—	—	25,278,176
Separate accounts assets <sup>1</sup>	167,090,862		_	(360,557)	4,235,991	20,018,318	_	(1,568,170)	— 1	89,416,444
Total	\$233,403,587	\$ —	\$ —	\$ (4,134,408) \$	643,727	\$22,070,710	\$ — \$	(1,568,205) \$	(13,720) \$ 2	250,401,691

<sup>1</sup> The total gains or (losses) included in surplus for separate accounts assets are offset by an equal amount for separate accounts liabilities, which results in a net zero impact on surplus for the Company.

### Transfers between levels

Transfers between levels may occur due to changes in valuation sources, changes in the availability of market observable inputs, which generally are caused by changes in market conditions such as liquidity, trading volume or bid?ask spreads, or as a result of a security measured at amortized cost at the beginning of the period, but measured at estimated fair value at the end of the period, or vice versa, due to a ratings downgrade or upgrade. For the separate accounts, transfers are mostly related to changes in the redemption restrictions of limited partnerships and hedge fund investments. The Company's policy is to assume the transfer occurs at the beginning of the period.

Transfers between Levels 1 and 2

During the three months ended June 30, 2018, there were no transfers between Levels 1 and 2.

Transfers into and out of Level 3

The Company's basis for transferring assets and liabilities into and out of Level 3 is based on changes in the observability of data, a change in the security's measurement or changes in redemption restrictions of certain separate accounts investments.

During the three months ended June 30, 2018, there were no transfers into or out of Level 3.

(3) Determination of fair value

The Company has an established and well-documented process for determining fair value. Security pricing is applied using a hierarchy approach whereby publicly available prices are first sought from nationally recognized third-party pricing services. For most private placement securities, the Company applies a market approach such as a matrix-based pricing methodology, which uses spreads derived from third-party benchmark bond indices. For private placement securities that cannot be priced through these processes, the Company uses internal models and calculations. All other securities are submitted to independent brokers for prices. The Company performs various analyses to ascertain that the prices represent fair value. Examples of procedures performed include, but are not limited to, back testing recent trades, monitoring trading volumes, and performing variance analysis of monthly price changes using different thresholds based on asset type. The Company also performs an annual review of all third-party pricing services. During this review, the Company obtains an understanding of the process and sources used by the pricing service to ensure that they maximize the use of observable inputs, the pricing service's frequency of updating prices, and the controls that the pricing service uses to ensure that their prices reflect market assumptions. The Company also selects a sample of securities and obtains a more detailed understanding from each pricing service regarding how they derived the price assigned to each security. Where inputs or prices do not reflect market participant assumptions, the Company may use non-binding broker quotes or internal valuations to support the fair value of securities that go through this formal price challenge process. At June 30, 2018, the Company challenged the price it received from third party pricing services on general account securities with a book value of \$10,855,332 and a market value of \$10,669,978 and separate accounts with a book value of \$137,677.

In addition, the Company has a pricing committee that provides oversight over the Company's prices and fair value process for securities. The committee is comprised of representatives from the Company's Investment Management group, Controller's, Compliance and Security Operations. The committee meets quarterly and is responsible for the review and approval of the Company's valuation procedures. The committee is also responsible for the review of pricing exception reports as well as the review of significant inputs used in the valuation of assets that are valued internally.

For Level 1 investments, valuations are generally based on observable inputs that reflect quoted prices for identical assets in active markets.

The fair value for Level 2 and Level 3 valuations are generally based on a combination of the market and income approach. The market approach generally utilizes market transaction data for the same or similar instruments, while the income approach involves determining fair values from discounted cash flow methodologies.

The following represents a summary of significant valuation techniques for assets and liabilities used to determine fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy.

#### Level 1 measurements

#### Common stocks

These securities are comprised of exchange traded U.S. and foreign common stock and mutual funds. Valuation of these securities is based on unadjusted quoted prices in active markets that are readily and regularly available.

#### Derivatives

These derivatives are comprised of exchange traded future contracts. Valuation of these securities is based on unadjusted quoted prices in active markets that are readily and regularly available.

#### Separate accounts assets

These assets are comprised of exchange traded funds, common stocks and actively traded open-end mutual funds with a daily net asset value ("NAV"). The NAV can be observed by redemption and subscription transactions between third parties, or may be obtained from fund managers. Therefore, the fair values of these investments has been reflected within Level 1 in the fair value hierarchy. Common stocks are generally traded on an exchange.

### Level 2 measurements

#### Bonds

The fair value of bonds is obtained from third-party pricing services, matrix-based pricing, internal models or broker quotes. Thirdparty pricing services generally use an income-based approach by using a discounted cash-flow model or it may also use a market approach by looking at recent trades of a specific security to determine fair value on public securities or a combination of the two. Typical inputs used by these pricing sources include, but are not limited to: benchmark yields, reported trades, issuer spreads, bids, offers, benchmark securities, estimated cash flows and prepayment speeds, which the Company has determined are observable inputs.

Private placement securities are primarily priced using a market approach such as a matrix-based pricing methodology, which uses spreads derived from third-party benchmark bond indices. Specifically, the Barclays Investment Grade Corporate Index is used for investment-grade securities and the Citi High Yield Cash Index is used for below investment-grade securities. These indices are two widely recognized, reliable, and well regarded benchmarks by participants in the financial services industry which represent the broader U.S. public bond markets.

Certain private placement securities that cannot be priced using the matrix pricing described above, are priced by an internally developed discounted cash flow model or are priced based on internal calculations. This model uses observable inputs with a discount rate based off spreads of comparable public bond issues adjusted for liquidity, rating and maturity. The Company assigns a credit rating for private placement securities based upon internal analysis. The liquidity premium is based upon observable market transactions, while the maturity and rating adjustments are based upon data obtained from Bloomberg. These securities are classified as Level 2. For some of the private placement securities priced through the model, the liquidity adjustments may not be based on market data, but rather, calculated internally. If the impact of the liquidity adjustment, which usually requires the most judgment, is not significant to the overall value of the security, the security is still classified as Level 2.

#### Common stocks

These securities represent investments in mutual funds where NAV may not be readily available or where there may be minor restrictions to redemption.

Derivatives (including separate accounts liabilities – derivatives)

The fair value of derivative instruments is generally derived using valuation models that use an income approach, except for derivatives, which are either exchange-traded, or the fair value is priced using broker quotations. The selection of a particular model depends upon the contractual terms of, and specific risks inherent in the instrument, as well as the availability of pricing information in the market. The Company generally uses similar models to value similar instruments. Valuation model inputs include contractual terms, yield curves,

foreign exchange rates, equity prices, credit curves, measures of volatility and other factors. OTC derivatives that trade in liquid markets, where model inputs are observable for substantially the full term, are classified as Level 2.

### Separate accounts assets

These are assets primarily related to investments in U.S. government and treasury securities, corporate bonds, and mortgage-backed securities. These separate accounts assets are valued and assigned within the fair value hierarchy, consistent with the methodologies described herein for similar financial instruments held within the general account of the Company. This also relates to investments in limited partnerships and hedge funds that use NAV where the investment can be redeemed at NAV at the measurement date or in the near-term (generally 90 days).

#### Level 3 measurements

#### Bonds

The valuation techniques for most Level 3 bonds are generally the same as those described in Level 2. However, if the investments are less liquid or are lightly traded, there is generally less observable market data, and therefore these investments will be classified as Level 3. Circumstances where observable market data are not available may include events such as market illiquidity and credit events related to the security. In addition, certain securities are priced based upon internal valuations using significant unobservable inputs.

If the price received from third-party pricing services does not appear to reflect market activity, the Company may challenge the price. For securities which go through this formal price challenge process, a non-binding broker quote, or internal valuation is used to support the fair value instead. The Company also uses non-binding broker quotes to fair value certain bonds, when the Company is unable to obtain prices from third-party vendors.

Private placement securities where adjustments for liquidity are considered significant to the overall price are classified as Level 3.

### Common stocks

These securities include equity investments with privately held entities, including a government organization, where the prices are derived from internal valuations.

#### Derivatives

Derivatives that are valued based upon models with any significant unobservable market inputs or inputs from less actively traded markets, or where the fair value is solely derived using broker quotations, are classified as Level 3.

#### Separate accounts assets

These assets are primarily related to limited partnership investments and hedge funds that are restricted with respect to transfer or withdrawal (generally greater than 90 days).

#### B. Not applicable.

C. The following table presents the carrying amounts and estimated fair values of the Company's financial instruments at June 30, 2018. Since the SSAP 100 hierarchy only applies to items that are measured at fair value at the reporting date, the items in the tables above are subsets of the amounts reported in the following table.

		Fair Value	C	arrying Amount		_evel 1		_evel 2		Level 3		Not acticable

<sup>1</sup> Excludes investments accounted for under the equity method.

#### Bonds

The fair value of bonds is determined by considering one of four primary sources: (1) security pricing is applied using a hierarchy approach whereby publicly available prices are first sought from nationally recognized third-party pricing services, (2) securities are priced using a matrix-based pricing methodology, which uses spreads derived from third-party benchmark bond indices, (3) securities are priced using an internal pricing model or methodology, and (4) securities are submitted to independent brokers for prices.

The pricing service generally uses an income-based approach by using a discounted cash-flow model or it may also use a market approach by looking at recent trades of a specific security to determine fair value on public securities or a combination of the two. Typical inputs used by these pricing services include, but are not limited to; benchmark yields, reported trades, issuer spreads, bids, offers, benchmark securities, estimated cash flows and prepayment speeds.

Independent pricing vendors do not supply prices for private placement bonds. These securities are primarily priced using a market approach such as a matrix-based pricing methodology, which uses spreads derived from third-party benchmark bond indices. Any private securities that cannot be priced using this methodology, are priced using an internally developed model based upon assigned comparable public issues adjusted for liquidity, maturity and rating or are priced based on internal calculations. The Company assigns a credit rating based upon internal analysis.

Prices from pricing services and broker quotes are validated on an ongoing basis to ensure the adequacy and reliability of the fair value measurement. The Company performs both quantitative and qualitative analysis of the prices including initial and ongoing review of third-party pricing methodologies, back testing of recent trades, and a thorough review of pricing trends and statistics.

Included in Bonds is an affiliated bond from MCF with a carrying value of \$1,839,256,585 and a fair value of \$1,954,412,440 at June 30, 2018. The fair value of this security is calculated internally and may include inputs that may not be observable. Therefore, this security is classified as Level 3.

#### Preferred and common stocks

The fair value of unaffiliated equity securities is determined by considering one of three primary sources: (1) security pricing is applied using a hierarchy approach whereby publicly available prices are first sought from third-party pricing services, (2) the remaining un-priced securities are submitted to independent brokers for prices, and (3) securities are priced using an internal pricing model or methodology.

Prices from pricing services and broker quotes are validated on an ongoing basis to ensure the adequacy and reliability of the fair value measurement. The Company performs both quantitative and qualitative analysis of the prices including, initial and ongoing review of third-party pricing methodologies, back testing of recent trades, and a thorough review of pricing trends and statistics.

#### Mortgage loans

The estimated fair value of mortgage loans is determined using an income approach based upon the present value of the expected cash flows discounted at an interpolated treasury yield plus a spread. The spread is based on management's judgment and assumptions and it takes into account property type, loan to value and remaining term of each loan. The spread is a significant component of the pricing inputs.

Cash, cash equivalents, short-term investments and investment income due and accrued

Cash on hand and money market mutual funds are classified as Level 1. Cash overdrafts (i.e. outstanding checks) are classified as Level 2. Due to the short-term maturities, the carrying value of short-term investments, cash, cash equivalents, and investment income due and accrued is presumed to approximate fair value.

### Derivatives (including separate accounts liabilities)

The fair value of derivative instruments is generally derived using valuation models that use an income approach, except for derivatives that are exchange-traded, which are valued using a market approach as fair value is based on quoted prices in an active market. Where valuation models are used, the selection of a particular model depends upon the contractual terms of, and specific risks inherent in the instrument, as well as the availability of pricing information in the market. The Company generally uses similar models to value similar instruments. Valuation model inputs include contractual terms, yield curves, foreign exchange rates, equity prices, credit curves, measures of volatility and other factors.

#### Derivatives - collateral (including separate accounts liabilities - collateral)

The carrying value of these instruments approximates fair value since these assets and liabilities are generally short-term in nature.

### Other invested assets

Other invested assets are principally comprised of LIHTC investments as well as other investments with characteristics of debt. The fair value of LIHTC investments is derived using an income valuation approach, which is based on a discounted cash flow calculation using a discount rate that is determined internally and therefore, classified as Level 3 (refer to Note 5 - Investments, for details on LIHTC investments). The fair value of the investments with debt characteristics is derived using an income valuation approach, which is based on discounted cash flow calculations that may or may not use observable inputs, and therefore these investments are classified as Level 2 or Level 3 depending on the observability of inputs.

#### Separate accounts assets (including separate accounts assets - collateral)

Assets within the separate accounts are primarily invested in bonds, common stocks and preferred stocks. The fair value of investments in the separate accounts is calculated using the same procedures as are used for bonds and common stocks in the general account.

The separate accounts also invest in limited partnerships and hedge fund investments. The fair value of such partnerships is determined by reference to the limited partnership's NAV. The valuation of the hedge funds is based upon the hedge funds' latest financial statements adjusted for cash activity since that date and estimates of market valuations.

#### Deposit fund contracts

Fair values for annuities certain liabilities are estimated using discounted cash flow calculations based on interest rates currently being offered for similar contracts with maturities consistent with those remaining for the contracts being valued.

#### Borrowed money

Borrowed money consists of a financing arrangement. The carrying value of the financing arrangement approximates fair value. The Company had no borrowed money as of June 30, 2018.

#### Amounts payable for securities lending

Amounts payable for securities lending consists of cash collateral received under securities lending agreements. The carrying value approximates fair value.

- D. If it is not practicable for an entity to estimate the fair value of that financial instrument or a class of financial instruments, the following shall be disclosed:
  - (1) (2) Not applicable.

#### 21. Other Items

A. Unusual or Infrequent Items

Not applicable.

B. Troubled Debt Restructuring: Debtors

Not applicable.

### C. Other Disclosures

No change.

D. Business Interruption Insurance Recoveries

Not applicable.

E. State Transferable and Non-transferable Tax Credits

Not applicable.

F. Subprime and Midprime Mortgage Related Risk Exposure No change.

G. Retained Assets

No change.

Je shanger

H. Insurance-Linked Securities ("ILS") Contracts

Not applicable.

### 22. Events Subsequent

As of August 10, 2018, the date the financial statements were available to be issued, there have been no events occurring subsequent to the close of the Company's books or accounts for the accompanying annual statement that would have a material effect on the financial condition of the Company.

### 23. Reinsurance

A. Ceded Reinsurance Report

Section 1 – General Interrogatories

No change.

Section 2 - Ceded Reinsurance Report - Part A

No change.

Section 3 - Ceded Reinsurance Report - Part B

No change.

### B. Uncollectible Reinsurance

Not applicable.

### C. Commutation of Ceded Reinsurance

The Company has reported in its operations in the current year as a result of commutation of reinsurance with the companies listed below, amounts which are reflected as:

		 Amount
(1)	Claims incurred	\$ _
(2)	Claim adjustment expenses incurred	\$ —
(3)	Premiums earned	\$ —
(4)	Other	\$ 20,500,000
(5)	Company	 Amount
	New York Life	\$ 20,500,000

Effective April 1, 2018, the Company's coinsurance with funds withheld and modified coinsurance agreements with New York Life to cede 90% of a block of inforce life insurance business were terminated and the Company fully recaptured the risks related to the business previously reinsured under the agreements. The Company paid New York Life a recapture fee in the amount of \$20,500,000 pre-tax. The recapture of these reinsurance agreements did not have a material impact to the Company's surplus.

### D. Certified Reinsurer Rating Downgraded or Status Subject to Revocation

Not applicable.

### E-G. Not applicable.

### 24. Retrospectively Rated Contracts and Contracts Subject to Redetermination

Not applicable.

25. Change in Incurred Losses and Loss Adjustment Expenses

Not applicable.

26. Intercompany Pooling Arrangements

Not applicable.

27. Structured Settlements

No change.

28. Health Care Receivables

Not applicable.

### 29. Participating Policies

Not applicable.

30. Premium Deficiency Reserves

Not applicable.

31. Reserves for Life Contracts and Annuity Contracts

No change.

32. Analysis of Annuity Actuarial Reserves and Deposit-Type Liabilities by Withdrawal Characteristics

No change.

### 33. Premium and Annuity Considerations Deferred and Uncollected

No change.

### 34. Separate Accounts

A. Separate Accounts Activity

No change.

B. General Nature and Characteristics of Separate Accounts Business

No change.

C. Reconciliation of Net Transfers to or (from) Separate Accounts

No change.

### 35. Loss/Claim Adjustment Expenses

Not applicable.

## **GENERAL INTERROGATORIES**
