County of New York

The officers of this reporting entity, being duly sworn, each depose and say that they are the described officers of said reporting entity, and that on the reporting period stated above, all of the herein described assets were the absolute property of the said reporting entity, free and clear from any liens or claims thereon, except as herein stated, and that this statement, together with related exhibits, schedules and explanations therein contained, annexed or referred to, is a full and true statement of all the assets and liabilities and of the condition and affairs of the said reporting entity as of the reporting period stated above, and of its income and deductions therefrom for the period ended, and have been completed in accordance with the NAIC Annual Statement Instructions and Accounting Practices and Procedures manual except to the extent that: (1) state law may differ; or, (2) state rules or regulations require differences in reporting not related to accounting practices and procedures, according to the best of their information, knowledge and belief, respectively. Furthermore, the scope of this attestation by the described officers also includes the related corresponding electronic filing with the NAIC, when required, that is an exact copy (except for formatting differences due to electronic filing) of the enclosed statement. The electronic filing may be requested by various regulators in lieu of or in addition to the enclosed statement.

NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies and Going Concern

A. The accompanying financial statements of New York Life Insurance Company ("the Company") have been prepared using accounting practices prescribed or permitted by the New York State Department of Financial Services ("NYSDFS").

The NYSDFS recognizes only statutory accounting practices prescribed or permitted by the State of New York for determining and reporting the financial position and results of operations of an insurance company and for determining its solvency under the New York State Insurance Law. The National Association of Insurance Commissioners' ("NAIC") Accounting Practices and Procedures Manual ("NAIC SAP") has been adopted as a component of prescribed or permitted practices by the State of New York. Prescribed statutory accounting practices include state laws and regulations. Permitted statutory accounting practices encompass accounting practices that are not prescribed; such practices differ from state to state, may differ from company to company within a state, and may change in the future. The Company has no permitted practices.

A reconciliation of the Company's net income and capital and surplus at March 31, 2018 and December 31, 2017 between practices prescribed or permitted by the State of New York and NAIC SAP is shown below:

	SSAP #	F/S Page	F/S Line #		2018	2017

^{*} NYSDFS Circular Letter No. 11 (2010) clarified the accounting for deferred premium assets when reinsurance is involved.

B. No change

C. (1) - (5) No change.

(6) Loan-backed and structured securities, which are included in bonds, are valued at amortized cost using the interest method including current assumptions of projected cash flows. Loan-backed and structured securities in or near default (rated NAIC 6) are stated at the lower of amortized cost or fair value. Amortization of the premium or accretion of discount from the purchase of these securities considers the estimated timing and amount of cash flows of the underlying loans, including prepayment assumptions based on data obtained from external sources or internal estimates. Projected future cash flows are updated monthly, and the amortized cost and effective yield of the securities are adjusted as necessary to reflect historical prepayment experience and changes in estimated future prepayments. For high credit quality loan-backed and structured securities (those rated AA or above at the date of acquisition), the adjustments to amortized cost are recorded as a charge or credit to net investment income in accordance with the retrospective method. For loan-backed and structured securities that are not of high credit quality (those rated below AA at date of acquisition), certain floating rate securities and securities with the potential for a loss of a portion of the original investment due to contractual prepayments (e.g. interest only securities), the effective yield is adjusted prospectively for any changes in estimated cash flows. Refer to Note 20 - Fair Value Measurements, for discussion on the valuation approach and methods for bonds.

The cost basis of loan-backed and structured securities is adjusted for impairments in value that are deemed to be other-than-temporary. An other-than-temporary loss is recognized in net income when it is anticipated that the amortized cost will not be recovered. The entire difference between the loan-backed or structured security's amortized cost and its fair value is recognized in net income only when the Company (1) has the intent to sell the security or (2) it does not have the intent and ability to hold the security to recovery. If neither of these two conditions exists, a realized loss is recognized in net income for the difference between the amortized cost basis of the security and the net present value of projected future cash flows expected to be collected. The net present value is calculated by discounting the Company's best estimate of projected future cash flows at the effective interest rate implicit in the loan-backed or structured security prior to impairment.

The new cost basis of an impaired security is not adjusted for subsequent increases in estimated fair value. In periods subsequent to the recognition of an other-than-temporary loss, the impaired loan-backed and structured security is accounted for as if it had been purchased on the measurement date of the impairment. Accordingly, the discount (or reduced premium) based on the new cost basis may be accreted into net investment income in future periods based on prospective changes in cash flow estimates, to reflect adjustments to the effective yield.

(7) - (13) No change.

D. Going Concern

The Company does not have any doubt about its ability to continue as a going concern.

2. Accounting Changes and Corrections of Errors

Not applicable.

^{**} NYSDFS Regulation 172 was amended to allow for the admission of an unearned reinsurance premium asset.

NOTES TO FINANCIAL STATEMENTS

3. Business Combinations and Goodwill

Not applicable.

4. Discontinued Operations

Not applicable.

5. Investments

A. Mortgage Loans, including Mezzanine Real Estate Loans

No change.

B. Debt Restructuring

No change.

C. Reverse Mortgages

No change.

D. Loan-Backed Securities

- (1) Prepayment assumptions for mortgage-backed/loan-backed and structured securities were obtained from external sources such as Intex and Blackrock Solutions.
- (2) The Company does not have any loan-backed and structured securities, which are other-than-temporarily impaired, where the Company intends to sell, or does not have the intent and ability to hold until recovery, at March 31, 2018.
- (3) The following table lists each security at a CUSIP level where the present value of cash flows expected to be collected is less than the amortized cost basis during the current year:

Total	\$11,527,527,910	\$	239,828,001	\$ 6,412,803,248	\$	331,320,837	\$17,940,331,158 \$	571,148,838		

(5) The Company performs quantitative and qualitative analysis to determine if a decline in fair value was temporary. For those securities where the decline was considered temporary, the Company did not take an impairment when it had the ability and intent to hold until recovery. Factors considered in evaluating whether a decline in value is other-than-temporary include: (1) whether the decline is substantial; (2) the duration that the fair value has been less than amortized cost; (3) the financial condition and near-term prospects of the issuer; and (4) the Company's ability and intent to retain the investment for the period of time sufficient to allow for an anticipated recovery in value. In addition, for the non-agency residential mortgage backed securities ("RMBS") portfolio, the Company updates cash flow projections quarterly. A projection is performed for each security based upon the evaluation of prepayment, delinquency, and default rates for the pool of mortgages collateralizing each security, and the projected impact on the course of future prepayments, defaults, and loss in the pool of mortgages, but do not include market prices. As a result, forecasts may change from period to period and additional impairments may be recognized over time as a result of deterioration in the fundamentals of a particular security or group of securities and/or a continuation of heightened mortgage defaults for a period longer than the assumptions used for the forecasts. Both qualitative and quantitative factors are used in creating the Company's RMBS cash flow models. As such, any estimate of impairments is subject to the inherent limitation on the Company's ability to predict the aggregate course of future events. It should therefore be expected that actual losses may vary from any estimate and the Company may recognize additional other-than-temporary losses.

E. Dollar Repurchase Agreements and/or Securities Lending Transactions

- (1) (2) No change.
- (3) Collateral Received
 - a. No change.
 - b. The Company has not sold or repledged collateral received from dollar repurchase or securities lending agreements. All collateral is received in cash.
 - c. No change.
- (4) (7) No change.

F. Repurchase Agreements Transactions Accounted for as Secured Borrowing

Not applicable

G. Reverse Repurchase Agreements Transactions Accounted for as Secured Borrowing - Cash Provider

(1) The Company enters into tri-party reverse repurchase agreements to purchase and resell short-term securities. The Company as a cash provider receives securities as collateral, having a fair value at least equal to 102% of the purchase price paid by the Company for the securities and the Company's designated custodian takes possession of this collateral. The Company is not permitted to sell or repledge these securities. The collateral is not recorded on the Company's financial statements. However, if the counterparty defaults, the Company would then exercise its rights with respect to the collateral, including a sale of the collateral. The fair value of the securities held as collateral is monitored daily and additional collateral is obtained, where appropriate, to protect against credit exposure. The Company records the amount paid for securities purchased under agreements to resell in cash, cash equivalents and short-term investments.

At March 31, 2018, the carrying value and fair value of securities held under agreements to purchase and resell was \$325,809,386, which were classified as tri-party reverse repurchase agreements and included with cash, cash equivalents and short-term investments on Page 2 - Assets. The securities had a weighted average maturity of two days and a weighted average yield of 1.8%.

- A C. During the 1st quarter of 2018, the Company recorded a \$600,000,000 dividend distribution receivable from its wholly-owned subsidiary, New York Life Insurance and Annuity Corporation ("NYLIAC"). The dividend distribution will be received in the 2nd quarter of 2018.
- D N. No change.
- 11. Debt
 - A. No change
 - B. Federal Home Loan Bank ("FHLB") Agreements
 - (1) On February 26, 2008, the Company became a member of the FHLB of NY and began issuing funding agreements to the FHLB of NY in exchange for cash. The proceeds from the sale of these funding agreements are invested to earn a spread on the business. The funding agreements are issued through the general account and are included in the liability for deposit-type contracts on Page 3 Liabilities, Surplus and Other Funds. When a funding agreement is issued, the Company is required to post collateral in the form of eligible securities including mortgage-backed, government and agency debt instruments for each of the advances received. Upon any event of default by the Company, the FHLB of NY's recovery on the collateral is limited to the amount of the

Company's liability to the FHLB of NY. The table below indicates the amounts of FHLB of NY stock purchased, collateral pledged, assets and liabilities related to the agreement with FHLB of NY.

(2) FHLB of NY Capital Stock

a. Amount of FHLB of NY capital stock held, in aggregate, is as follows:

1. Current Year

	Total	G	eneral Account	Separat	e Accounts
(a) Membership stock - Class A	\$ _	\$	_	\$	_
(b) Membership stock - Class B	37,938,800		37,938,800		_
(c) Activity stock	119,250,000		119,250,000		_
(d) Excess stock	_		_		_
(e) Aggregate total	\$ 157,188,800	\$	157,188,800	\$	_
(f) Actual or estimated borrowing capacity as determined by the insurer	\$ 8,204,057,534	\$	8,204,057,534	\$	
2. Prior Year					
	 Total	G	eneral Account	Separat	e Accounts
(a) Membership stock - Class A	\$ _	\$	_	\$	_
(b) Membership stock - Class B	37,938,800		37,938,800		_
(c) Activity stock	118,125,000		118,125,000		_
(d) Excess stock	_		_		_
(e) Aggregate total	\$ 156,063,800	\$	156,063,800	\$	_
(f) Actual or estimated borrowing capacity	 		·		

The FHLB borrowing capacity for the Company is determined using 5% of the Company's total admitted assets at the current reporting date, less any secured borrowing amounts.

b. Membership stock (Class A and B) eligible and not eligible for redemption is as follows:

	C	urrent Year Total	ot Eligible for Redemption	ss than 6 Months	lonths to Less in 1 Year	1 t	o Less than 3 Years	3 to	5 Years
Membership stock			_				_		
1. Class A	\$	_	\$ _	\$ _	\$ _	\$	_	\$	_
2. Class B	\$	37,938,800	\$ 37,938,800	\$ _	\$ _	\$	_	\$	_

(3) Collateral pledged to FHLB of NY

a. Amount pledged as collateral as of reporting date is as follows:

	Fair Value ¹	С	arrying Value ¹	Α	ggregate Total Borrowing
Current year total general and separate accounts	\$ 3,858,215,782	\$	3,817,204,429	\$	2,655,027,480
2. Current year general account	\$ 3,858,215,782	\$	3,817,204,429	\$	2,655,027,480
3. Current year separate accounts	\$ _	\$	_	\$	_
4. Prior year total general and separate accounts	\$ 3,421,030,231	\$	3,293,633,882	\$	2,629,599,364

¹ Includes amounts in excess of minimum requirements.

b. Maximum amount of collateral pledged during reporting period is as follows:

	Fair Value	Carrying Value	Time of Maximum Collateral
Current year total general and separate accounts	\$ 3,858,215,782	\$ 3,817,204,429	\$ 2,655,027,480
2. Current year general account	\$ 3,858,215,782	\$ 3,817,204,429	\$ 2,655,027,480
3. Current year separate accounts	\$ _	\$ _	\$ _
Prior year total general and separate accounts	\$ 3,956,160,074	\$ 3,779,696,262	\$ 2,179,824,356

(4) Borrowing from FHLB of NY

a. Amount borrowed as of reporting date is as follows:

1. Current Year

	 Total	General Account	Separate Accounts	Funding Agreements Reserves Established
(a) Debt	\$ 	\$ 	\$ _	\$
(b) Funding agreements	2,655,027,480	2,655,027,480	_	2,655,027,480
(c) Other	_	_	_	_
(d) Aggregate total	\$ 2,655,027,480	\$ 2,655,027,480	\$ _	\$ 2,655,027,480

2. Prior Year

	Total	General Account	Separate Accounts		Funding Agreements Reserves Established
(a) Debt	\$ _	\$ _	\$ _	_	\$ _
(b) Funding agreements	2,629,599,364	2,629,599,364	_	-	2,629,599,364
(c) Other	_	_	_	_	_
(d) Aggregate total	\$ 2,629,599,364	\$ 2,629,599,364	\$ 	_ :	\$ 2,629,599,364

b. Maximum amount borrowed during current reporting period is as follows:

	Total	General Account	oarate ounts
1. Debt	\$ _	\$ _	\$
2. Funding agreements	2,655,027,480	2,655,027,480	_
3. Other	 <u> </u>	<u> </u>	
4. Aggregate total	\$ 2,655,027,480	\$ 2,655,027,480	\$

c. FHLB of NY borrowings subject to prepayment obligations is as follows:

Does the Company have prepayment obligations under the following arrangements

	(YES/NO)?
1. Debt	N/A
2. Funding agreements	No
3. Other	N/A

12. Retirement Plans, Deferred Compensation, Postemployment Benefits and Compensated Absences and Other Postretirement Benefit

A. Defined Benefit Plans

The Company shares the net periodic benefit cost of certain pension and postretirement benefits with its subsidiaries. The expenses for these plans are allocated to each subsidiary in accordance with an intercompany cost sharing arrangement. The liabilities for these plans are included with the liabilities for the corresponding plan of the Company. Pension and postretirement costs of \$12,064,521 and \$2,483,386, respectively, were billed to subsidiaries for the three months ended ended March 31, 2018. Pension and postretirement costs of \$46,172,050 and \$9,103,918, respectively, were billed to subsidiaries for the year ended December 31, 2017.

No change.

NOTES TO FINANCIAL STATEMENTS

20. Fair Value Measurements

- A. The Company's financial assets and liabilities carried at fair value have been classified, for disclosure purposes, based on a hierarchy defined by SSAP No. 100, Fair Value Measurements. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. This guidance establishes a framework for measuring fair value that includes a hierarchy used to classify the inputs used in measuring fair value. The hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three levels. The level in the fair value hierarchy within which the fair value measurement falls is determined based on the lowest level input that is significant to the fair value measurement.
 - (1) The levels of the fair value hierarchy are based on the inputs to the valuation as follows:
 - **Level 1** Fair value is based on unadjusted quoted prices for identical assets or liabilities in an active market. Active markets are defined as a market in which many transactions occur with sufficient frequency and volume to provide pricing information on an ongoing basis.
 - Level 2 Observable inputs other than level 1 prices, such as quoted prices in active markets for similar assets or liabilities; quoted prices in markets that are not active for identical or similar assets or liabilities, or other model driven inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Valuations are generally obtained from third-party pricing services for identical or comparable assets or liabilities or through the use of valuation methodologies using observable market inputs.
 - Level 3 Instruments whose values are based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. These inputs reflect management's own assumptions in pricing the asset or liability. Pricing may also be based upon broker quotes that do not represent an offer to transact. Prices are determined using valuation methodologies such as option pricing models, discounted cash flow models and other similar techniques. Non-binding broker quotes, which are utilized when pricing service information is not available, are reviewed for reasonableness based on the Company's understanding of the market, and are generally considered Level 3. To the extent the internally developed valuations use significant unobservable inputs, they are classified as Level 3.

The following table represents the balances of assets and liabilities measured at fair value as of March 31, 2018;

			Α	uoted Prices in active Markets for Identical ssets (Level 1)	Significant Observable Inputs (Level 2)	ι	Significant Jnobservable Inputs (Level 3)	Total

Total	\$1,018,922,708	\$ 6,458,307	\$ (30,663,733)	\$ 8,334,415	\$ 21,450,667	\$ 87,613,901	\$ —	\$ (46,571,191)	\$ (310,857)	\$1,065,234,217

The total gains or (losses) included in surplus for separate accounts assets are offset by an equal amount for separate accounts liabilities, which results in a net zero impact on surplus for the

Transfers between levels

Transfers between levels may occur due to changes in valuation sources, changes in the availability of market observable inputs, which generally are caused by changes in market conditions such as liquidity, trading volume or bid/ask spreads, or as a result of a security measured at amortized cost at the beginning of the period, but measured at estimated fair value at the end of the period, or vice versa, due to a ratings downgrade or upgrade. For the separate accounts, transfers are mostly related to changes in the redemption restrictions of limited partnerships and hedge fund investments. The Company's policy is to assume the transfer occurs at the beginning of the period.

Transfers between Levels 1 and 2

During the three months ended March 31, 2018, there were no transfers between Levels 1 and 2.

Transfers into and out of Level 3

The Company's basis for transferring assets and liabilities into and out of Level 3 is based on changes in the observability of data, change in the security's measurement or changes in redemption restrictions of certain separate account investments.

Transfers into Level 3 totaled \$6,458,307 for the three months ended March 31, 2018, which primarily relates to \$3,378,775 of non-agency asset-backed securities which did not have a price level change or rating change, but are measured at fair value at the end of the period and were previously measured at amortized cost at the beginning of the period, and \$2,597,082 of non-agency asset-backed securities which had a price level change from Level 2 to Level 3. Transfers out of Level 3 totaled \$30,663,733 for the three months ended March 31, 2018, which primarily relates to \$30,649,676 of separate accounts assets due to changes in the redemption restrictions for certain hedge funds in which the separate accounts invest.

(3) Determination of fair value

The Company has an established and well-documented process for determining fair value. Security pricing is applied using a hierarchy approach whereby publicly available prices are first sought from nationally recognized third-party pricing services. For most private placement securities, the Company applies a market approach such as a matrix-based pricing methodology, which uses spreads derived from third-party benchmark bond indices. For private placement securities that cannot be priced through these processes, the Company uses internal models and calculations. All other securities are submitted to independent brokers for prices. The Company performs various analyses to ascertain that the prices represent fair value. Examples of procedures performed include, but are not limited to, back testing recent trades, monitoring trading volumes, and performing variance analysis of monthly price changes using different thresholds based on asset type. The Company also performs an annual review of all third-party pricing services. During this review, the Company obtains an understanding of the process and sources used by the pricing service to ensure that they maximize the use of observable inputs, the pricing service's frequency of updating prices, and the controls that the pricing service uses to ensure that their prices reflect market assumptions. The Company also selects a sample of securities and obtains a more detailed understanding from each pricing service regarding how they derived the price assigned to each security. Where inputs or prices do not reflect market participant assumptions, the Company will challenge these prices and apply different methodologies that will enhance the use of observable inputs and data. The Company may use non-binding broker quotes or internal valuations to support the fair value of securities that go through this formal price challenge process. At March 31, 2018, the Company challenged the price it received from third party pricing services on securities with a book value of \$4,555,

In addition, the Company has a pricing committee that provides oversight over the Company's prices and fair value process for securities. The committee is comprised of representatives from the Company's Investment Management group, Controller's, Compliance and Security Operations. The committee meets quarterly and is responsible for the review and approval of the Company's valuation procedures. The committee is also responsible for the review of pricing exception reports as well as the review of significant inputs used in the valuation of assets that are valued internally.

For Level 1 investments, valuations are generally based on observable inputs that reflect quoted prices for identical assets in active markets.

The fair value for Level 2 and Level 3 valuations are generally based on a combination of the market and income approach. The market approach generally utilizes market transaction data for the same or similar instruments, while the income approach involves determining fair values from discounted cash flow methodologies.

The following represents a summary of significant valuation techniques for assets and liabilities used to determine fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy.

Level 1 measurements

Common stocks

These securities are comprised of exchange traded U.S. and foreign common stock and mutual funds. Valuation of these securities is based on unadjusted quoted prices in active markets that are readily and regularly available.

NOTES TO FINANCIAL STATEMENTS

Derivatives (including separate accounts liabilities – derivatives)

These derivatives are comprised of exchange traded future contracts. Valuation of these securities is based on unadjusted quoted prices in active markets that are readily and regularly available.

Separate accounts assets

These assets are comprised of cash and common stocks. Common stocks are generally traded on an exchange.

Level 2 measurements

Preferred stocks

The fair value of preferred stock is obtained from third-party pricing services. Vendors generally use an income-based valuation approach by using a discounted cash flow model or it may use a market approach to arrive at the security's fair value or a combination of the two.

Bonds

The fair value of bonds is obtained from third-party pricing services, matrix-based pricing, internal models or broker quotes. Third-party pricing services generally use an income-based valuation approach by using a discounted cash-flow model or it may also use a market approach by looking at recent trades of a specific security to determine fair value on public securities or a combination of the two. Typical inputs used by these pricing sources include, but are not limited to: benchmark yields, reported trades, issuer spreads, bids, offers, benchmark securities, estimated cash flows and prepayment speeds, which the Company has determined are observable inputs.

Private placement securities are primarily priced using a market approach such as a matrix-based pricing methodology, which uses spreads derived from third-party benchmark bond indices. Specifically, the Barclays Investment Grade Credit Index is used for investment-grade securities and the Citi High Yield Cash Index is used for below investment-grade securities. These indices are two widely recognized, reliable, and well regarded benchmarks by participants in the financial services industry, which represent the broader U.S. public bond markets.

Certain private placement securities that cannot be priced using the matrix pricing described above, are priced by an internally developed discounted cash flow model or are priced based on internal calculations. This model uses observable inputs with a discount rate based off spreads of comparable public bond issues, adjusted for liquidity, rating and maturity. The Company assigns a credit rating for private placement securities based upon internal analysis. The liquidity premium is based upon observable market transactions, while the maturity and rating adjustments are based upon data obtained from Bloomberg. These securities are classified as Level 2.

For some of the private placement securities priced through the model, the liquidity adjustments may not be based on market data, but rather, calculated internally. If the impact of the liquidity adjustment, which usually requires the most judgment, is not significant to the overall value of the security, the security is still classified as Level 2.

Derivatives

The fair value of derivative instruments is generally derived using valuation models that use an income approach, except for derivatives, which are either exchange-traded, or the fair value is priced using broker quotations. The selection of a particular model depends upon the contractual terms of, and specific risks inherent in the instrument, as well as the availability of pricing information in the market. The Company generally uses similar models to value similar instruments. Valuation model inputs include contractual terms, yield curves, foreign exchange rates, equity prices, credit curves, measures of volatility, and other factors. OTC derivatives that trade in liquid markets, where model inputs are observable for substantially the full term, are classified as Level 2.

Separate accounts assets

These are assets primarily related to investments in U.S. government and treasury securities, corporate bonds, and mortgage-backed securities. These separate accounts assets are valued and assigned within the fair value hierarchy, consistent with the methodologies described herein for similar financial instruments held within the general account of the Company. This also relates to investments in limited partnerships and hedge funds that use NAV where the investment can be redeemed at NAV at the measurement date or in the near-term (generally 90 days).

Level 3 measurements

Bonds

The valuation techniques for most Level 3 bonds are generally the same as those described in Level 2. However, if the investments are less liquid or are lightly traded, there is generally less observable market data, and therefore these investments will be classified as Level 3. Circumstances where observable market data are not available may include events such as market illiquidity and credit events related to the security. In addition, certain securities are priced based upon internal valuations using significant unobservable inputs.

If the price received from third-party pricing services does not appear to reflect market activity, the Company may challenge the price. For securities which go through this formal price challenge process, a non-binding broker quote or internal valuation is used to support the fair value instead. The Company also uses non-binding broker quotes to fair value certain bonds, when the Company is unable to obtain prices from third-party vendors.

Private placement securities where adjustments for liquidity are considered significant to the overall price are classified as Level 3.

Preferred and common stocks

These securities include equity investments with privately held entities, including a government organization, where the prices are derived from internal valuations.

Derivatives

Derivatives that are valued based upon models with any significant unobservable market inputs or inputs from less actively traded markets, or where the fair value is solely derived using broker quotations, are classified as Level 3.

Separate accounts assets

These assets are primarily related to limited partnership investments and hedge funds that are restricted with respect to transfer or withdrawal (generally greater than 90 days).

B. Not applicable.

C. The following table presents the carrying amounts and estimated fair values of the Company's financial instruments at March 31, 2018. Since the SSAP 100 hierarchy only applies to items that are measured at fair value at the reporting date, the items in the tables above are subsets of the amounts reported in the following table.

	Fair Value	С	arrying Amount	Level 1		Level 2		Level 3	Pra	Not acticable

¹ Excludes investments accounted for under the equity method.

Bonds

The fair value of bonds is determined by considering one of four primary sources: (1) security pricing is applied using a hierarchy approach whereby publicly available prices are first sought from nationally recognized third-party pricing services, (2) securities are priced using a matrix-based pricing methodology, which uses spreads derived from third-party benchmark bond indices, (3) securities are priced using an internal pricing model or methodology, and (4) securities are submitted to independent brokers for prices

The pricing service generally uses an income-based valuation approach by using a discounted cash-flow model or it may also use a market approach by looking at recent trades of a specific security to determine fair value or a combination of the two. Typical inputs used by these pricing services include, but are not limited to: benchmark yields, reported trades, issuer spreads, bids, offers, benchmark securities, estimated cash flows and prepayment speeds.

Independent pricing vendors do not supply prices for private placement bonds. These securities are primarily priced using a market approach such as a matrix-based pricing methodology, which uses spreads derived from third-party benchmark bond indices. Any private securities that cannot be priced using this methodology, are priced using an internally developed model based upon assigned comparable public issues adjusted for liquidity, maturity and rating, or are priced based on internal calculations. The Company assigns a credit rating based upon internal analysis.

Prices from pricing services and broker quotes are validated on an ongoing basis to ensure the adequacy and reliability of the fair value measurement. The Company performs both quantitative and qualitative analysis of the prices including initial and ongoing review of third-party pricing methodologies, back testing of recent trades, and a thorough review of pricing trends and statistics.

Included in bonds are affiliated bonds from MCF and NYL Investments. The affiliated bond from MCF had a carrying value of \$2,171,047,666 and a fair value of \$2,301,946,578 at March 31, 2018. The fair value of this security is calculated internally and may include inputs that may be not observable. Therefore, this security is classified as Level 3. The affiliated bond from NYL Investments had a carrying value of \$600,000,000 and a fair value of \$606,864,000 at March 31, 2018. The fair value of this security is calculated internally using observable inputs and is therefore classified at Level 2.

Preferred and common stocks

The fair value of unaffiliated equity securities is determined by considering one of three primary sources: (1) security pricing is applied using a hierarchy approach whereby publicly available prices are first sought from third-party pricing services, (2) the remaining un-priced securities are submitted to independent brokers for prices, and (3) securities are priced using an internal pricing model or methodology.

Prices from pricing services and broker quotes are validated on an ongoing basis to ensure the adequacy and reliability of the fair value measurement. The Company performs both quantitative and qualitative analysis of the prices including, initial and ongoing review of third-party pricing methodologies, back testing of recent trades, and a thorough review of pricing trends and statistics.

Mortgage loans

The estimated fair value of mortgage loans is determined using an income approach based upon the present value of the expected cash flows discounted at an interpolated treasury yield plus a spread. The spread is based on management's judgment and assumptions and it takes into account property type, loan to value and remaining term of each loan. The spread is a significant component of the pricing inputs.

Cash, cash equivalents, short-term investments and investment income due and accrued

Cash on hand and money market mutual funds are classified as Level 1. Cash overdrafts (i.e. outstanding checks) are classified as Level 2. Due to the short-term maturities, the carrying value of short-term investments, cash equivalents and investment income due and accrued is presumed to approximate fair value.

Derivatives (including separate accounts liabilities)

The fair value of derivative instruments is generally derived using valuation models that use an income approach, except for derivatives that are exchange-traded, which are valued using a market approach as fair value is based on quoted prices in an active market. Where valuation models are used, the selection of a particular model depends upon the contractual terms of, and specific risks inherent in the instrument, as well as the availability of pricing information in the market. The Company generally uses similar models to value similar instruments. Valuation model inputs include contractual terms, yield curves, foreign exchange rates, equity prices, credit curves, measures of volatility, and other factors.

Other invested assets

Other invested assets are principally comprised of LIHTC investments, affiliated loans and certain other investments with characteristics of debt. The fair value of one of the affiliated loans and the LIHTC investments are derived using an income valuation approach, which is based on a discounted cash flow calculation using a discount rate that is determined internally. These investments are classified as Level 3 because the discount rate used is based on management's judgment and assumptions. Refer to Note 10 - Information Concerning Parent, Subsidiaries, Affiliates and Other Related Parties, for details on intercompany loans and Note 5 - Investments, for details on LIHTC investments. The fair value of investments with debt characteristics is derived using an income valuation approach, which is based on a discounted cash flow calculation that uses observable inputs. For affiliated loans due within one year, carrying value is deemed to approximate fair value due to the short-term nature of these investments. These investments are classified as Level 2.

Derivatives – collateral (including separate accounts liabilities collateral)

The carrying value of these instruments approximates fair value since these assets and liabilities are generally short-term in nature.

Separate accounts assets

Assets within the separate accounts are primarily invested in bonds and common stock. The fair value of investments in the separate accounts is calculated using the same procedures as are used for bonds and common stocks in the general account.

The separate accounts also invest in limited partnerships and hedge fund investments. The fair value of such partnerships is determined by reference to the limited partnership's NAV. The valuation of the hedge funds is based upon the hedge funds' latest financial statements adjusted for cash activity since that date and estimates of market valuations.

Deposit fund contracts

For funding agreements backing medium term notes, fair values are based on available market prices for the notes. For other funding agreements and annuities certain liabilities, fair values are estimated using discounted cash flow calculations based on interest rates currently being offered for similar contracts with maturities consistent with those remaining for the contracts being valued.

For all other deposit funds, estimated fair value is equal to account value.

Premiums paid in advance

For premiums paid in advance, the carrying value of the liability approximates fair value.

Borrowed money

Borrowed money consists of intercompany borrowings, repurchase agreements and other financing arrangements. Due to the short-term nature of the transactions, the carrying value approximates fair value. The Company had no repurchase agreements as of March 31, 2018.

Amounts payable under securities lending

Amounts payable under securities lending consists of cash collateral received under securities lending agreements. The carrying value approximates fair value.

Separate accounts liabilities – deposit-type contracts

For deposit type contracts, which are funding agreements, the proceeds from which are invested primarily in fixed income securities, the carrying value of the liability approximates the fair value of the invested assets. These assets are valued using the same methods described for separate accounts assets.

D. If it is not practicable for an entity to estimate the fair value of that financial instrument or a class of financial instruments, the following shall be disclosed:

(1) - (2) Not applicable.

21. Other Items

A. Unusual or Infrequent Items

Not applicable.

B. Troubled Debt Restructuring: Debtors

Not applicable.

C. Other Disclosures

No change.

D. Business Interruption Insurance Recoveries

Not applicable

E. State Transferable and Non-Transferable Tax Credits

No change.

F. Subprime and Midprime Mortgage Related Risk Exposure

No change.

G. Retained Assets

H. Insurance-Linked Securities ("ILS") Contracts

Not applicable

22. Events Subsequent

Effective April 1, 2018, the Company's coinsurance with funds withheld and modified coinsurance agreements with NYLIAC to assume 90% of a block of inforce life insurance business were terminated and NYLIAC fully recaptured the risks related to the business previously reinsured under the agreements. The Company received a recapture fee in the amount of \$20,500,000 pre-tax. The recapture of these reinsurance contracts will not have an impact to the Company's surplus.

As of May 11, 2018, the date the financial statements were available to be issued, there have been no events, other than that described above, occurring subsequent to the close of the Company's books or accounts for the accompanying annual statement that would have a material effect on the financial condition of the Company.

23. Reinsurance

A. Ceded Reinsurance Report

Section 1 - General Interrogatories

No change.

Section 2 - Ceded Reinsurance Report - Part A

24. Retrospectively Rated Contracts and Contracts Subject to Redetermination

- A C. Not applicable.
 - D. No change.
 - E. Risk Sharing Provisions of the ACA
 - $(1) \quad \text{At March 31, 2018, the Company wrote accident and health insurance premiums which is subject to the ACA risk sharing provisions.}$
 - (2) The impact of risk-sharing provisions of the ACA on admitted assets, liabilities and revenue for the three months ended March 31, 2018 are as follows:
 - a. Permanent ACA Risk Adjustment Program

Not applicable.

b. Transitional ACA Reinsurance Program

At March 31, 2018, the Company's liability for contributions payable due to ACA reinsurance program (not reported as ceded premium) was \$1,764.

c. Temporary ACA Risk Corridors Program

Not applicable.

NOTES TO FINANCIAL STATEMENTS

(3) A roll-forward of prior year ACA risk-sharing provisions for the following liability balance at March 31, 2018 is as follows:

	Accrued During the Prior Year on Business Written Before December 31 of the Prior Year		crued During the Received or Paid as of			Differ	ences	Adj	ustments	Unsettled Balances as of the Reporting Date			
			Vritten mber 31	the Current Year on Business Written Before December 31 of the Prior Year		Prior Year Accrued Less Payments	Prior Year Accrued Less	To Prior Year Balances	To Prior Year Balances		Cumulative Balance from Prior Years	Cumulative Balance from Prior Years

d. Total for ACA risk- sharing provisions	\$ -	_ ;	\$ 1,890	\$	· \$	\$	\$ 1,890	\$	\$ (126)		<u> </u>	\$ 1,764	

Explanation of Adjustments:

- A. 2 covered lives were removed during 2018.
- (4) The Company had no risk corridors asset and liability balances for the three months ended March 31, 2018.
- (5) The Company had no ACA risk corridors receivable for the three months ended March 31, 2018.

25. Change in Incurred Losses and Loss Adjustment Expenses

- A. Reserves at December 31, 2017 were \$1,357,943,997. As of March 31, 2018, \$50,173,198 has been paid for incurred losses and loss adjustment expenses attributable to insured events of prior years. Reserves remaining for prior years are now \$1,218,761,969 as a result of re-estimation of unpaid claims and claim adjustment expenses principally on group medical, disability income, Medicare supplement of insurance and long term care lines of insurance. Therefore, there has been a \$89,008,830 favorable prior-year development from December 31, 2017 to March 31, 2018. The decrease is generally the result of ongoing analysis of recent loss development trends. Original estimates are increased or decreased, as additional information becomes known regarding individual claims. The Company has no unfavorable prior year loss development on retrospectively rated policies included in this decrease. However, the business to which it relates is subject to premium adjustments.
- B. Not applicable.
